

## Central America and Caribbean :: Dominican Republic

### Introduction :: Dominican Republic

#### Background:

The Taino - indigenous inhabitants of Hispaniola prior to the arrival of the Europeans - divided the island into five chiefdoms and territories. Christopher COLUMBUS explored and claimed the island on his first voyage in 1492; it became a springboard for Spanish conquest of the Caribbean and the American mainland. In 1697, Spain recognized French dominion over the western third of the island, which in 1804 became Haiti. The remainder of the island, by then known as Santo Domingo, sought to gain its own independence in 1821 but was conquered and ruled by the Haitians for 22 years; it finally attained independence as the Dominican Republic in 1844. In 1861, the Dominicans voluntarily returned to the Spanish Empire, but two years later they launched a war that restored independence in 1865. A legacy of unsettled, mostly non-representative rule followed, capped by the dictatorship of Rafael Leonidas TRUJILLO from 1930 to 1961. Juan BOSCH was elected president in 1962 but was deposed in a military coup in 1963. In 1965, the United States led an intervention in the midst of a civil war sparked by an uprising to restore BOSCH. In 1966, Joaquin BALAGUER defeated BOSCH in an election to become president. BALAGUER maintained a tight grip on power for most of the next 30 years when international reaction to flawed elections forced him to curtail his term in 1996. Since then, regular competitive elections have been held in which opposition candidates have won the presidency. Former President Leonel FERNANDEZ Reyna (first term 1996-2000) won election to a new term in 2004 following a constitutional amendment allowing presidents to serve more than one term, and was since reelected to a second consecutive term.

## Economy :: Dominican Republic

### Economy - overview:

The Dominican Republic has long been viewed primarily as an exporter of sugar, coffee, and tobacco, but in recent years the service sector has overtaken agriculture as the economy's largest employer, due to growth in telecommunications, tourism, and free trade zones. The economy is highly dependent upon the US, the destination for more than half of exports. Remittances from the US amount to about one-tenth of GDP, equivalent to almost half of exports and three-quarters of tourism receipts. The country suffers from marked income inequality; the poorest half of the population receives less than one-fifth of GDP, while the richest 10% enjoys nearly 40% of GDP. High unemployment and underemployment remains an important long-term challenge. The Central America-Dominican Republic Free Trade Agreement (CAFTA-DR) came into force in March 2007, boosting investment and exports and reducing losses to the Asian garment industry. The growth of the Dominican Republic's economy rebounded from the global recession in 2010-12 and remains one of the fastest growing in the region although its fiscal situation is weak; the fiscal deficit climbed from 2.6% in 2011 to approximately 8% in 2012. A tax reform package passed in November 2012 aims to narrow this deficit.
