Introduction :: Israel

Background:

Following World War II, the British withdrew from their mandate of Palestine, and the UN partitioned the area into Arab and Jewish states, an arrangement rejected by the Arabs. Subsequently, the Israelis defeated the Arabs in a series of wars without ending the deep tensions between the two sides. (The territories Israel occupied since the 1967 war are not included in the Israel country profile, unless otherwise noted.) On 25 April 1982, Israel withdrew from the Sinai pursuant to the 1979 Israel-Egypt Peace Treaty. In keeping with the framework established at the Madrid Conference in October 1991, bilateral negotiations were conducted between Israel and Palestinian representatives and Syria to achieve a permanent settlement. Israel and Palestinian officials signed on 13 September 1993 a Declaration of Principles (also known as the "Oslo Accords") guiding an interim period of Palestinian self-rule. Outstanding territorial and other disputes with Jordan were resolved in the 26 October 1994 Israel-Jordan Treaty of Peace. Progress toward a permanent status agreement was undermined by Israeli-Palestinian violence between September 2003 and February 2005. Israel in 2005 unilaterally disengaged from the Gaza Strip, evacuating settlers and its military while retaining control over most points of entry into the Gaza Strip. The election of HAMAS to head the Palestinian Legislative Council in 2006 froze relations between Israel and the Palestinian Authority (PA). In 2006 Israel engaged in a 34-day conflict with Hizballah in Lebanon in June-August 2006 and a 23-day conflict with HAMAS in the Gaza Strip during December 2008 and January 2009. Prime Minister Binyamin NETANYAHU formed a coalition in March 2009 following a February 2009 general election. Direct talks with the PA launched in September 2010 collapsed following the expiration of Israel's 10-month partial settlement construction moratorium in the West Bank.

note: adopted 2004, unofficial since 1948; used as the anthem of the Zionist movement since 1897; the 1888 arrangement by Samuel COHEN is thought to be based on the Romanian folk song "Carul cu boi" (The Ox Driven Cart)

Economy :: Israel

Economy - overview:

Israel has a technologically advanced market economy. Its major imports include crude oil, grains, raw materials, and military equipment. Cut diamonds, high-technology equipment, and pharmaceuticals are among the leading exports. Israel usually posts sizable trade deficits, which are covered by tourism and other service exports, as well as significant foreign investment inflows. The global financial crisis of 2008-09 spurred a brief recession in Israel, but the country entered the crisis with solid fundamentals - following years of prudent fiscal policy and a resilient banking sector. The economy has recovered better than most advanced, comparably sized economies. In 2010, Israel formally acceded to the OECD. Israel's economy also has weathered the Arab Spring because strong trade ties outside the Middle East have insulated the economy from spillover effects. Natural gasfields discovered off Israel's coast during the past two years have brightened Israel's energy security outlook. The Leviathan field was one of the world's largest offshore natural gas finds this past decade, and production from the Tama field is expected to meet all of Israel's natural gas demand beginning mid-2013. In mid-2011, public protests arose around income inequality and rising housing and commodity prices. The government formed committees to address some of the grievances but has maintained that it will not engage in deficit spending to satisfy populist demands.
