**Introduction :: Mozambique**

**Background:**

Almost five centuries as a Portuguese colony came to a close with independence in 1975. Large-scale emigration, economic dependence on South Africa, a severe drought, and a prolonged civil war hindered the country's development until the mid 1990s. The ruling Front for the Liberation of Mozambique (Frelimo) party formally abandoned Marxism in 1989, and a new constitution the following year provided for multiparty elections and a free market economy. A UN-negotiated peace agreement between Frelimo and rebel Mozambique National Resistance (Renamo) forces ended the fighting in 1992. In December 2004, Mozambique underwent a delicate transition as Joaquim CHISSANO stepped down after 18 years in office. His elected successor, Armando Emilio GUEBUZA, promised to continue the sound economic policies that have encouraged foreign investment. President GUEBUZA was reelected to a second term in October 2009. However, the elections were flawed by voter fraud, questionable disqualification of candidates, and Frelimo use of government resources during the campaign. As a result, Freedom House removed Mozambique from its list of electoral democracies.

## Economy :: Mozambique

### Economy - overview:

At independence in 1975, Mozambique was one of the world's poorest countries. Socialist mismanagement and a brutal civil war from 1977-92 exacerbated the situation. In 1987, the government embarked on a series of macroeconomic reforms designed to stabilize the economy. These steps, combined with donor assistance and with political stability since the multi-party elections in 1994, have led to dramatic improvements in the country's growth rate. Fiscal reforms, including the introduction of a value-added tax and reform of the customs service, have improved the government's revenue collection abilities. In spite of these gains, Mozambique remained dependent upon foreign assistance for 40% of its 2012 annual budget and over half the population remained below the poverty line. Subsistence agriculture continues to employ the vast majority of the country's work force and smallholder agricultural productivity and productivity growth is weak. A substantial trade imbalance persists although aluminum production from the Mozal smelter has significantly boosted export earnings in recent years. In 2012, The Mozambican government took over Portugal's last remaining share in the Cahora Bassa Hydroelectricity Company (HCB), a significant contributor to the Southern African Power Pool. The government has plans to expand the Cahora Bassa Dam and build additional dams to increase its electricity exports and fulfill the needs of its burgeoning domestic industries. Mozambique's once substantial foreign debt has been reduced through forgiveness and rescheduling under the IMF's Heavily Indebted Poor Countries (HIPC) and Enhanced HIPC initiatives, and is now at a manageable level. In July 2007, the US government's Millennium Challenge Corporation (MCC) signed a \$506.9 million Compact with Mozambique. Compact projects will end in September 2013 and are focusing on improving sanitation, roads, agriculture, and the business regulation environment in an effort to spur economic growth in the four northern provinces of the country. Citizens rioted in September 2010, after fuel, water, electricity, and bread price increases were announced. In an attempt to lessen the negative impact on people, the government implemented subsidies, decreased taxes and tariffs, and instituted other fiscal measures. Mozambique grew at an average annual rate of 6%-8% in the decade up to 2012, one of Africa's strongest performances. Mozambique's ability to attract large investment projects in natural resources is expected to fuel continued high growth in coming years. Revenues from these vast resources, including natural gas, coal, titanium and hydroelectric capacity, could overtake donor assistance within five years.

**general assessment:** a fair telecommunications system that is shackled with a heavy state presence, lack of competition, and high operating costs and charges

**domestic:** stagnation in the fixed-line network contrasts with rapid growth in the mobile-cellular network; mobile-cellular coverage now includes all the main cities and key roads, including those from Maputo to the South African and Swaziland borders, the national highway through Gaza and Inhambane provinces, the Beira corridor, and from Nampula to Nacala; extremely low fixed-line teledensity; despite significant growth in mobile-cellular services, teledensity remains low at about 35 per 100 persons

**international:** country code - 258; landing point for the EASSy and SEACOM fiber-optic submarine cable systems; satellite earth stations - 5 Intelsat (2 Atlantic Ocean and 3 Indian Ocean) (2011)

#### **Broadcast media:**

1 state-run TV station supplemented by private TV station; Portuguese state TV's African service, RTP Africa, and Brazilian-owned TV Miramar are available; state-run radio provides nearly 100% territorial coverage and broadcasts in multiple languages; a number of privately owned and community-operated stations; transmissions of multiple international broadcasters are available (2007)

## **Transnational Issues :: Mozambique**

---

### **Disputes - international:**

South Africa has placed military units to assist police operations along the border of Lesotho, Zimbabwe, and Mozambique to control smuggling, poaching, and illegal migration

### **Illicit drugs:**

southern African transit point for South Asian hashish and heroin, and South American cocaine probably destined for the European and South African markets; producer of cannabis (for local consumption) and methaqualone (for export to South Africa); corruption and poor regulatory capability make the banking system vulnerable to money laundering, but the lack of a well-developed financial infrastructure limits the country's utility as a money-laundering center
