

North America :: **Bermuda**
(overseas territory of the UK)

Introduction :: Bermuda

Background:

Bermuda was first settled in 1609 by shipwrecked English colonists headed for Virginia. Vacationing to the island to escape North American winters first developed in Victorian times. Tourism continues to be important to the island's economy, although international business has overtaken it in recent years. Bermuda has also developed into a highly successful offshore financial center. A referendum on independence from the UK was soundly defeated in 1995.

Economy :: Bermuda

Economy - overview:

Despite four years of recession and a public debt of \$1.4 billion, Bermuda enjoys the fourth highest per capita income in the world, about 70% higher than that of the US. The average cost of a single-family home in 2012 was \$1.1 million. Its economy is primarily based on international business and the provision of financial services to that sector, and to a lesser extent tourism. A number of reinsurance companies relocated to the island following the 11 September 2001 attacks on the US and again after Hurricanes Katrina, Rita, and Wilma in 2005, contributing to the expansion of an already robust international business sector. Bermuda's tourism industry - which derives over 80% of its visitors from the US - continues to struggle and has dropped in its relevant importance to the economy, although it is still important as a job creator. Bermuda must import almost everything. Agriculture is limited due to the small size of the island and Bermuda's industrial sector is small.
