**Introduction :: El Salvador**

**Background:**

El Salvador achieved independence from Spain in 1821 and from the Central American Federation in 1839. A 12-year civil war, which cost about 75,000 lives, was brought to a close in 1992 when the government and leftist rebels signed a treaty that provided for military and political reforms.

**Demographic profile:**

El Salvador is the smallest and most densely populated country in Central America. It is well into its demographic transition, experiencing slower population growth, a decline in its number of youths, and the gradual aging of its population. The increased use of family planning has substantially lowered El Salvador's fertility rate, from approximately 6 children per woman in the 1970s to replacement level today. A 2008 national family planning survey showed that female sterilization remained the most common contraception method in El Salvador - its sterilization rate is among the highest in Latin America and the Caribbean - but that the use of injectable contraceptives is growing. Fertility differences between rich and poor and urban and rural women are narrowing.

Salvadorans fled during the 1979 to 1992 civil war mainly to the United States but also to Canada and to neighboring Mexico, Guatemala, Honduras, Nicaragua, and Costa Rica. Emigration to the United States increased again in the 1990s and 2000s as a result of deteriorating economic conditions, natural disasters (Hurricane Mitch in 1998 and earthquakes in 2001), and family reunification. At least 20% of El Salvador's population lives abroad. The remittances they send home account for close to 20% of GDP, are the second largest source of external income after exports, and have helped reduce poverty.

#### Economy :: El Salvador

#### Economy - overview:

The smallest country in Central America geographically, El Salvador has the third largest economy in the region. With the global recession in 2009, real GDP contracted by 3.1%. The economy slowed even further during 2010-12. Remittances accounted for 17% of GDP in 2011 and were received by about a third of all households. In 2006, El Salvador was the first country to ratify the Dominican Republic-Central American Free Trade Agreement (CAFTA-DR), which has bolstered the export of processed foods, sugar, and ethanol, and supported investment in the apparel sector amid increased Asian competition. El Salvador has promoted an open trade and investment environment and has completed a wave of privatizations extending to telecom, electricity distribution, banking, and pension funds. The Salvadoran Government maintained fiscal discipline during post-war reconstruction and reconstruction following earthquakes in 2001 and hurricanes in 1998 and 2005, but El Salvador's external debt has been mounting over the last several years. Taxes levied by the government include a value added tax (VAT) of 13%, income tax of 30%, excise taxes on alcohol and cigarettes, and import duties. The VAT accounted for about 51.7% of total tax revenues in 2011. El Salvador's external debt amounts to about one-fourth of GDP. In 2012, El Salvador successfully completed a \$461 million compact with the Millennium Challenge Corporation (MCC) - a United States Government agency aimed at stimulating economic growth and reducing poverty - in the country's northern region, the primary conflict zone during the civil war, through investments in education, public services, enterprise development, and transportation infrastructure. In January 2013, the MCC approved El Salvador as eligible for a possible second MCC compact.
